## Summary

I am a Upwork Freelancer and Full Stack Web Developer working on PHP, Laravel, Livewire, MySQL, Vue.js, Nuxt.js and Alpine.js. I am developing web applications based on Laravel also testing, deploying, and maintaining web applications in production environments, maintaining, and optimizing web application performance, troubleshooting technical issues, etc. During my web development process, I mostly have to use PHP, OOP, Laravel, Livewire, HTML, CSS, JavaScript, Vue.js, database management using MySQL, Version Control system, IDE, and database editor, and Integrate third-party API and payment gateways. In my whole web development career, I have worked on E-Commerce, Hospital Management System, Multivendor E-Commerce, POS, Inventory Management System, and Fintech business domains.

## Professional Experience

**Full Stack Developer, Appdevs**

Location: Dhaka, Rajbari.

**January 2021 – Running**

It is also a codecanyon-based growing software company that has proving fintech and mobile application solutions. Here my role is to extend the features of their product and API development, deployment web applications, payment method integration and social auth etc.

**Full Stack Developer, Appdevs**

Location: Upwork Freelancer.

**October 2023 – Running**

Upwork is a well-known online platform that connects freelancers with clients seeking various services, including web development, design, writing, marketing, and more. It allows freelancers to create profiles showcasing their skills and expertise, while clients can post projects and hire freelancers directly through the platform. Upwork provides tools for communication, project management, and payment processing to facilitate smooth collaboration between freelancers and clients.
